in association with

THE ILLAWARRA REGIONAL ADVISORY COUNCIL,  
DEPARTMENT OF DECENTRALISATION AND DEVELOPMENT,  
NEW SOUTH WALES

## INTRODUCTION

The Wollongong Statistical Handbook is the first of three statistical handbooks dealing with the component districts of the Illawarra Region. Similar handbooks are in preparation for Shellharbour Shire and the Serrins District (comprised of Bowral, Mittagong and Wingecarribee local government areas).

The statistical handbooks are a joint project of the Illawarra Regional Advisory Council and the Economics Department of the University of Wollongong. Data in the handbooks has been prepared by members of the Economics Department, employed on a part time basis. Typing services have been provided by the Department of Decentralisation and the Economics Department. Funds for compiling and printing the handbooks have been provided by the Illawarra Regional Advisory Council.

Supervision and direction of the project is by John Swinke, Senior Lecturer in Economics at the University of Wollongong and Research Director of the Regional Advisory Council.

The objective of the handbook series is to provide ready, reliable and reasonably comprehensive sources of data about the Illawarra Region, and its constituent local government areas, for people in many aspects of community life. It is hoped the information in the handbooks will aid informed decision making by business men, trade unionists, civil servants and politicians, as well as serving as a research aid for students at all levels.

The Wollongong Statistical Handbook brings together results of the censuses of 1954, 1961, 1966 and 1971 for the Wollongong Statistical District and its component local government areas of Wollongong, Shellharbour and Kiama. In addition to census material relating to population, population characteristics, housing and economic activity, the handbook

contains a variety of statistical series derived from annual reports of various State government departments and instrumentalities.

It is the intention of the Economics Department, and the Regional Advisory Council, to publish new edition of the three statistical handbooks in the latter part of 1978, when detailed information will be available from the 1976 census. Suggestions relating to the addition or deletion of material from the handbooks, and the manner of presentation of material, will be welcomed and should be directed to John Steinke, Senior Lecturer in Economics, the University of Wollongong.
